Schroder UK Alpha Income Fund

a sub-fund of Schroder Investment Fund Company

Class Z Income GBP (GB00B073JS25)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth and income.

Investment Policy

At least 80% of the fund will be invested in shares of UK companies. The fund has no bias to any particular industry.

The fund follows an investment approach based around the business cycle, where the managers attempt to identify turning points in the cycle and then focus on the types of companies they believe will benefit from it. The fund has a natural bias toward companies that pay out an above-average dividend.

The fund may also invest in other financial instruments and hold cash on deposit. Derivatives may be used to reduce risk or manage the fund more effectively.

Benchmark

This unit class is managed with reference to the FTSE All Share Total Return financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class pays income received from the fund's investments to you half yearly.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year	
Ongoing Charge	0.91%
Charges taken from the fund under certain specific conditions	
Performance fee	None

This is the maximum that might be taken out of your money before it is invested.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending June 2016 and may vary from year to year.

Please see the prospectus for more details about the charges.

Past Performance

1 Performance achieved during this period was achieved under circumstances that no longer apply. The fund name and charges changed on 24 March 2014.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 6 May 2005.
