Sterling Class A – Accumulation shares ISIN no. GB00B8G41W07

Managed by M&G Securities Limited, which is part of the Prudential Group

Objective and investment policy

The fund aims to provide income and grow capital over five years or more by investing mainly in UK commercial property.

Core investment: At least 70% of the fund is directly invested in UK commercial property.

Other investments: The fund may also invest in other property-related assets, including other funds, real estate investment trusts, money market instruments (for example, debt due to be repaid within a year) and cash.

Strategy in brief: The fund manager selects attractively priced properties from across a range of sectors and regions. The focus is on adding value by managing and improving properties to enhance their capital value and rental income.

Other information

The fund is a Property Authorised Investment fund for tax purposes.

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

If you hold Income shares, any income from the fund may be paid out to you quarterly.

If you hold Accumulation shares, any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund.

Risk and reward profile

- The value of investments and the income from them will rise and fall. This will cause the fund price, as well as any income paid by the fund, to fall as well as rise. There is no guarantee the fund will achieve its objective, and you may not get back the amount you originally invested.
- The fund is valued daily on both an 'offer' basis (how much its assets would cost to buy) and a 'bid' basis (how much the fund would receive if assets were sold). The difference between the two is known as the 'spread', which is currently around 6.25%.
- The fund invests mainly in one type of asset. It is therefore more vulnerable to market changes for that specific type of asset. This type of fund can carry a higher risk and can experience bigger price gains and falls when compared to a fund which invests in more types of assets.
- If significant numbers of investors withdraw their investments from the fund at the same time, the manager may be forced to dispose of property investments. This may result in less than favourable prices being obtained in the market for those investments.
- Property valuations are provided by an independent valuer and are subject to the judgement of the valuer.
- Where market conditions make it hard to sell the fund's investments at a fair price to meet customers' sale requests, we may temporarily suspend dealing in the fund's shares.
- The fund manager will place transactions, hold investments and place cash on deposit with a range of counterparties (opposite parties). There is a risk that counterparties or tenants of properties may default (fail to pay) on their obligations or become insolvent.
- All of the above risks could have an adverse effect on the value of your investment.

A more detailed description of the risk factors that apply to the fund can be found in the fund's Prospectus.
