M&G Strategic Corporate Bond Fund

Sterling Class A – Income shares ISIN no. GB0033828020

Sterling Class A – Accumulation shares ISIN no. GB0033828137

Managed by M&G Securities Limited, which is part of the Prudential Group

Objective and investment policy

The fund aims to provide income and capital growth.

Core investment: At least 70% of the fund is invested in investment grade bonds issued by companies from anywhere in the world.

Other investments: The fund also invests in bonds issued by governments (usually of developed countries) and high yield bonds. In addition, it may hold cash or assets that can be turned into cash quickly.

Use of derivatives: Derivatives may be used to gain exposure to the fund's core and other investments, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

Strategy in brief: The fund manager selects investments based on an assessment of a combination of macroeconomic, asset, sector and stock-level factors. Spreading investments across issuers and industries is an essential element of the fund's strategy and the manager is assisted in the selection of individual bonds by an in-house team of analysts.

Glossary terms:

Bonds: Loans to governments and companies that pay interest.

Derivatives: Financial contracts whose value is derived from other assets.

High yield Bonds: Bonds issued by companies considered to be riskier and therefore generally paying a higher level of interest.

Investment grade corporate Bonds: Bonds issued by a company with a medium or high credit rating from a recognised credit rating agency. They are considered to be at lower risk from default than those issued by companies with lower credit ratings.

Risk and reward profile

- The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value of investments and the income from them will rise and fall. This will cause the fund price, as well as any income paid by the fund, to fall as well as rise. There is no guarantee the fund will achieve its objective, and you may not get back the amount you originally invested.
- The fund may use derivatives with the aim of profiting from a rise or a fall in the value of an asset (for example, a company's bonds). However, if the asset's value varies in a different manner, the fund may incur a loss.
- When interest rates rise, the value of the fund is likely to fall.
- The value of the fund may fall if the issuer of a fixed income security held is unable to pay income payments or repay its debt (known as a default).
- Where market conditions make it hard to sell the fund's investments at a fair price to meet customers' sale requests, we may temporarily suspend dealing in the fund's shares.
- Some transactions the fund makes, such as placing cash on deposit, require the use of other financial institutions (for example, banks). If one of these institutions defaults on their obligations or becomes insolvent, the fund may incur a loss.

A more detailed description of the risk factors that apply to the fund can be found in the fund's Prospectus.

You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the year ending 31 August 2016. This figure may change from year to year. It excludes portfolio transaction costs.
