

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Strategic Bond Fund I-Class

I-Class Income Units, ISIN: GB00B544HM32, (also representative of I-Class Accumulation Units, ISIN: GB00B4T6SD53).
The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

The objective of the Fund is to pay investors a high income with the prospect for capital growth. The Fund will invest in high yield bonds, investment grade bonds, government bonds, convertible bonds and other bonds.

The Fund may also invest in derivatives - these allow the Fund Manager to track changes in the price of an asset, or 'basket' of assets, for example a corporate bond or an index, without actually owning it. Derivatives can be used with the aim of benefiting from the price of an investment falling. The Fund Manager can use derivatives to gain exposure to a number of different asset classes, including company shares, financial indices, commodities and currency exchange rates.

The Fund Manager is able to make their own investment decisions, is not constrained by any geographical or sector limits and is not guided by any particular benchmark.

If you select I-Class Accumulation Units any income payable by the Fund will be automatically reinvested and reflected in the price of the units. If you select I-Class Income Units any income payable by the Fund will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- There is a risk that companies providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- Bonds are very sensitive to interest rate changes and it is possible that bond issuers will not pay interest or return the capital promised. Bonds can also be 'downgraded' by ratings agencies. All of these events can reduce the value of bonds held by the Fund and therefore impact performance.
- The Fund can invest a significant portion of the portfolio in high yield bonds and bonds which are not rated by a credit rating agency. While such bonds may offer a higher income, the interest paid on them and their capital value is at greater risk of not being repaid, particularly during periods of changing market conditions. The value of income payments will fluctuate.
- In difficult market conditions, reduced liquidity in bond markets may make it harder for the manager to sell assets at the quoted price. This could have a negative impact on the value of your investment. In extreme market conditions, certain assets may become hard to sell in a timely manner or at a fair price. This could affect the Fund's ability to meet investors' redemption requests upon demand.
- This Fund may use derivatives for investment purposes which may cause large fluctuations in the value of the Fund. Investments in financial derivative instruments can introduce leverage risks which can amplify gains or losses in the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.73%
