M&G Strategic Corporate Bond Fund Sterling Class I – Accumulation shares ISIN no. GB00B7J4YT87

Managed by M&G Securities Limited, which is part of the Prudential Group

Objective and investment policy

The fund aims to provide income and capital growth.

Core investment: At least 70% of the fund is invested in investment grade bonds issued by companies from anywhere in the world.

Other investments: The fund also invests in bonds issued by governments (usually of developed countries) and high yield bonds. In addition, it may hold cash or assets that can be turned into cash quickly.

Use of derivatives: Derivatives may be used to gain exposure to the fund's core and other investments, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

Strategy in brief: The fund manager selects investments based on an assessment of a combination of macroeconomic, asset, sector and stock-level factors. Spreading investments across issuers and industries is an essential element of the fund's strategy and the manager is assisted in the selection of individual bonds by an in-house team of analysts.

Glossary terms:

Bonds: Loans to governments and companies that pay interest.

Derivatives: Financial contracts whose value is derived from other assets.

High yield bonds: Bonds issued by companies considered to be riskier and therefore generally paying a higher level of interest.

Investment grade corporate bonds: Bonds issued by a company with a medium or high credit rating from a recognised credit rating agency. They are considered to be at lower risk from default than those issued by companies with lower credit ratings.

Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund may lose as much as or more than the amount invested.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.
