

NON-UCITS RETAIL SCHEME KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

THREADNEEDLE DYNAMIC REAL RETURN FUND (THE "FUND")

Class Z Accumulation Shares (GBP) GB00B93TQ868, a sub-fund of Threadneedle Opportunity Investment Funds ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The aim of the Fund is to provide a positive real rate of return above inflation (defined as the Consumer Price Index) over the medium to long term and to provide a positive return over a three year time period, notwithstanding market conditions. Positive returns are not guaranteed and no form of capital protection applies.

The Fund invests in shares of companies and bonds (which are similar to a loan and pay a fixed or variable interest rate) issued by companies and governments, money market instruments, cash, currencies, property and commodities worldwide. Commodities are physical materials such as oil, agricultural products, and metals.

The Fund makes active investment decisions and may vary exposure to or at times choose not to invest in some of the types of investments listed.

The Fund invests directly in these assets, through regulated or unregulated funds, or by using derivatives. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

Income from investments in the Fund will be added to the value of your shares.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds", and in Appendix I.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 5 based on the Fund's risk limit which indicates that it may show a medium to high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- As this Fund invests into other funds you should consider the underlying investments and overall risks.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- Positive returns are not guaranteed and no form of capital protection applies.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund's assets may sometimes be difficult to value objectively and the actual value may not be recognised until assets are sold.
- The Fund may invest materially in derivatives. A relatively small change in the value of the underlying investment may have a much larger positive or negative impact on the value of the derivative.
- All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	0.92%
------------------	-------

Charges taken from the fund under specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure is based on expenses for the year ending 25/05/18. This figure may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

Past Performance

Source: Morningstar

Past performance is not a guide to future performance.

Fund launch date: 18/06/2013

Share/unit class launch date: 18/06/2013

Performance is calculated in GBP.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

Practical Information

- Depositary: Citibank Europe plc, UK branch.
