FRAMLINGTON EQUITIES

AXA Framlington UK Equity Income Fund

Unit class : AXA Framlington Blue Chip Equity Income Fund Z Accumulation GBP (ISIN: GB00B7KBNV36)

This Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The aim of this Fund is to produce higher than average income with long-term growth of income and capital. The fund manager also intends to achieve a yield of distributable income in excess of 100% of the FTSE All Share yield at the Fund's year end on a rolling 3 year basis, and in excess of 90% on an annual basis.

Investment Policy

The Fund has at least 70% of its investments in shares of companies domiciled, incorporated or having significant business in the UK, which the fund manager believes are leading companies within their sector and will provide above-average returns. The Fund has at least 51% of its investments in large companies which are in the FTSE 100 index. The fund manager selects shares based upon analysis of a company's prospects for future growth in dividend payments, financial status, quality of its management, expected profitability and prospects for growth. The fund manager expects that the Fund's portfolio will typically consist of shares of between 30-50 different companies, although the actual number of holdings could be greater or less than this range. The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the FTSE 350 Total Return index. The FTSE 350 Total Return index is designed to measure the performance of the shares of the 350 largest UK listed companies. This index best represents the types of companies in which the Fund predominantly invests.

The Fund may also invest in other transferable securities, cash, deposits, units in collective investment schemes (including those managed or operated by, or whose authorised corporate director is the Manager or one of its associates) and money market instruments. The Fund may use derivatives for Efficient Portfolio Management. Use may be made of borrowing, cash holdings, hedging and other investment techniques permitted in the applicable Financial Conduct Authority rules. The Fund invests in shares of companies primarily listed in the UK. This Fund is actively managed in reference to the FTSE 350 Total Return index, which may be used by investors to compare the Fund's performance.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks

Concentration Risk: as this Fund may, from time to time, hold relatively few investments, it may be subject to greater fluctuations in value than a fund holding a larger number of investments.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.
