

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# UK Alpha Fund

A sub-fund of Ninety One Funds Series i  
managed by Ninety One Fund Managers UK Limited

Class I Income shares in sterling  
ISIN: GB0032558966

### Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) and income over at least 5-year periods.

The Fund invests primarily (at least two-thirds) in the shares of UK companies (those incorporated in, or that have significant economic exposure to, the UK).

The term "alpha" in the Fund's name means above average opportunities for capital growth and income.

Investment opportunities are identified using in-depth analysis and research on individual companies.

The companies may be of any size and in any industry sector.

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives (financial contracts whose value is linked to the price of an underlying asset). Derivatives may be used for investment purposes and/or managing the Fund in a way that is designed to reduce risk or cost and/or generate income or growth with a low level of risk).

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives. The FTSE All-Share Total Return Index is used for performance comparison. The Fund does not seek to replicate the index.

The Investment Association UK All Companies Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is paid out to you.

You can buy or sell shares in the Fund on any Dealing Day as defined in the definitions section of the prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

### Risk and reward profile

Lower risk  
Potentially lower rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

**Geographic / Sector:** Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that the resulting value may decrease whilst portfolios more broadly invested might grow. The full list of the Fund's risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 30 September 2019. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

### One-off charges taken before or after you invest

Entry charge 0%

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge 0.82%

### Charges taken from the fund under certain specific conditions

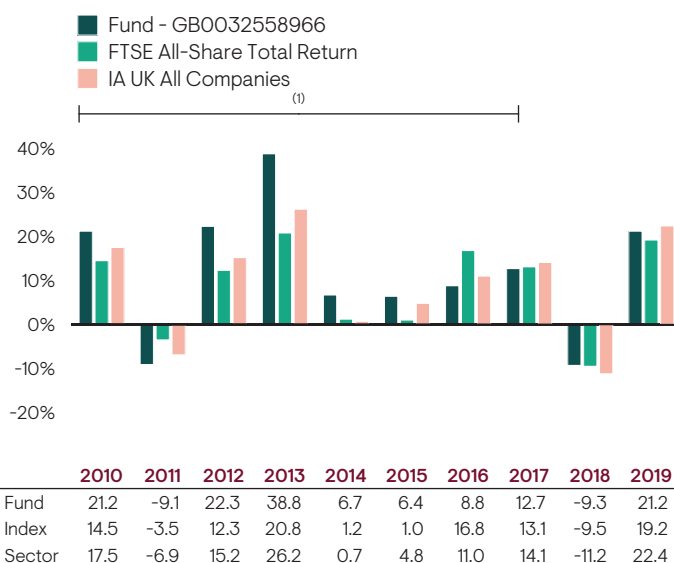

Performance fee None

## Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested. The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 5 February 1979 and this share class on 22 April 2003.

(1): Due to an investment policy change on 07 April 2017, performance was achieved under different circumstances
